- Openness to feedback

PROFILE

VMotivated Information Technology graduate with internship experience in software development and front-end engineering. Learned and applied C++, C#, Java, Python, PHP, JavaScript, HTML, CSS, Flutter, and MySQL during academic coursework, building a strong foundation in programming and problem-solving. Gained practical experience with Angular during internship training, applying it to create responsive and maintainable user interfaces. Quick to adapt to new technologies, detail-oriented, and passionate about creating efficient, user-friendly solutions. Seeking an entry-level role as a Software Developer / Front-End Developer to apply technical skills and grow within a collaborative development team.

WORK EXPERIENCE

SOFTWARE DEVELOPMENT INTERN
Infor
March - June 2025

- Assisted in developing and maintaining responsive user interfaces using Angular and TypeScript, improving UI performance.
- Refactored code and applied the company's Infor Design System to ensure consistency and maintainability.
- Worked with developers to help identify and fix UI bugs, gaining practical problem-solving experience.
- Participated in daily Scrum meetings and learned to use Jira for task tracking and team collaboration.
